PROFESSIONAL SUMMARY

B.Sc Data Science graduate with hands-on foundations in SQL, Python, Excel, Power BI, statistics, and business-focused data analysis. Skilled in cleaning and validating data, building analytical queries, developing dashboards, and translating findings into actionable insights. Developing AI-assisted analytics and automation skills to improve analysis, reporting, and decision support. Seeking entry-level Data Analyst, BI Analyst, Reporting Analyst, Operations Analyst, or Analytics Associate roles.

TECHNICAL SKILLS

- **Programming & Analysis:** Python (Pandas, NumPy), Data Cleaning, Exploratory Data Analysis
- **Databases:** SQL (Joins, CTEs, Subqueries, Window Functions)
- **Visualization & BI:** Power BI (DAX, Data Modeling, Interactive Dashboards), Tableau
- **Spreadsheets:** Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Charts, Data Analysis)
- **Statistics:** Descriptive Statistics, Probability, Correlation, Trend Analysis
- **AI & Automation:** LLM-assisted SQL/Python, AI-assisted insight generation, analytical workflow automation

PROJECTS

[Retail Revenue & Customer Intelligence Platform]

- Built an end-to-end analytics workflow using SQL, Python, Excel, and Power BI to analyze transaction, customer, product, and regional performance data.
- Designed reusable SQL analyses for revenue, margin, customer cohorts, repeat-purchase behavior, product performance, and month-over-month trends.
- Created an executive Power BI dashboard with KPI tracking, drill-down analysis, customer segmentation, and exception-focused views for decision support.
- Applied AI-assisted analysis to accelerate SQL development, exploratory questions, insight summarization, and management-ready reporting while validating outputs against source data.

[Customer Support Operations & SLA Analytics]

- Analyzed customer-support ticket data across channels, issue types, priority, agents, response time, resolution time, and SLA status using Python and SQL.
- Built data-quality checks for missing values, duplicate tickets, invalid timestamps, inconsistent categories, and SLA calculation errors before reporting.
- Developed a Power BI operations dashboard to monitor ticket volume, backlog, first-response time, resolution time, SLA breaches, and agent/team performance.
- Used statistical and trend analysis to identify operational bottlenecks and convert findings into measurable recommendations for staffing, queue management, and process improvement.

CERTIFICATION

- Google Data Analytics Professional Certificate – Coursera
- Microsoft Excel Data Analysis (Basic to Advance) – Udemy
- SQL Bootcamp Data Analysis – Udemy

EDUCATION

Bachelor of Science [Data Science] 06/2023 – 03/2026
Islamiah College Autonomous, Vaniyambadi
Thiruvallur University.

Schooling [10–12th] 06/2021 – 04/2023
Anaikar Oriental Higher Secondary School, Ambur
State Board, Tamil Nadu.
